- **Power:** USB powered, no external power adapter required
- **Build:** Aluminum casing for durability and heat dissipation
- **Installation:** Simple Plug-and-Play installation

Description

The HUBBIES12B 4-Port USB 3.2 Gen 1 Hub expands a single USB-C port on your laptop or desktop into two USB-C ports and two USB-A ports, giving you flexible connectivity for both modern and legacy peripherals.

Simply plug the hub into a USB-C enabled device such as a MacBook, Chromebook or other late-model laptop and connect USB accessories including external drives, flash drives, keyboards, mice and smartphones. With USB 3.2 Gen 1 SuperSpeed transfer rates up to 5Gbps, it supports fast data syncing for work, study and entertainment at home, in the office or on the go.

The hub is powered via USB, so no external power adapter is required. Its aluminum

casing helps with heat dissipation and adds durability, while the compact form factor and simple plug-and-play installation make it an easy way to extend your USB-C device's connectivity.
