Description

119255 DisplayPort 1.4 Cable is built for high-bandwidth video and audio transmission between a PC, docking station, graphics card, and a DisplayPort monitor.

With support for up to 8K/60Hz and 4K/120Hz (system and display dependent), it is suitable for modern workstations, high refresh-rate monitors, and home theater setups. The cable is backward compatible with DisplayPort 1.3/1.2/1.1 devices for flexible upgrades.

Gold-plated connectors help maintain stable signal quality, while the integrated metal latch keeps the plug securely connected to reduce accidental disconnections. VESA compliance plus DP 8K certification, HDR, DSC, MST, and HDCP support make this cable a reliable choice for high-resolution and multi-display environments.
