Description

The 119391 DisplayPort to HDMI Adapter Cable (3.0m) provides a direct and reliable solution for connecting a DisplayPort-enabled device—such as a desktop PC, laptop, or workstation—to an HDMI display including monitors, TVs, and projectors. Designed to ensure smooth signal conversion without the need to upgrade existing displays, this cable supports video resolutions up to 4K at 30Hz, delivering crisp clarity for work, streaming, presentations, or home entertainment.

Its unidirectional design ensures stable transmission from a DisplayPort source to an HDMI display, making it ideal for office setups, classrooms, and multimedia environments. The gold-plated connectors enhance conductivity and reduce signal loss, providing consistent performance even over a longer 3-meter cable length.

With support for multiple resolution modes depending on system and hardware capability, the 119391 cable offers a future-ready, plug-and-play experience suitable for both professional and everyday users.
