Description

The equip 128965 7-Port USB 3.2 Gen 1 Hub with Power Adapter expands a single USB port into seven high-speed USB 3.2 Gen 1 ports, allowing you to connect multiple peripherals through one compact hub.

Connect the hub to your notebook or desktop PC and attach devices such as external hard drives, SSDs, printers, scanners, smartphones, flash drives, keyboards and mice. It is ideal for home and office setups where you need to manage several USB devices simultaneously while keeping your workspace organized.

The hub uses an external 5V/2A power adapter and integrated power jack to deliver more stable power than bus-powered hubs, especially when connecting high-draw USB devices. Individual power switches with LED indicators let you control each port separately, while the aluminum alloy + ABS housing, 30cm cable and simple plug-and-play installation provide a durable and convenient USB expansion solution.
